DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claim 1, the recitations “for receiving an operating element of an actuator” and “for stopping the operating element” are functional in that neither the operating element nor the actuator are positively recited. Consequently, the “operating element” recited in Claims 2-4 lacks antecedent basis because said element lacks positive antecedent basis in the parent claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Stone, et al.

Stone discloses movable braking plate 11 with buffering members 28, and stator (3 or 8). Because the operating element lacks positive recitation in Claims 1-4 it is and not included in the rejection of Claims 1-4.

4. Claims 5, 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Stone, et al.

Stone discloses an actuator with movable braking plate 11, with buffering members 28, receiving operating element 12, and stator (3 or 8).

Allowable Subject Matter

5. Claims 6, 8, 10, 12-14 are allowed.
6. Claims 7 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. The following is a statement of reasons for the indication of allowable subject matter: Stone, et al., failed to disclose or teach that the operating element and braking plate can adsorb each other by a magnetic force.
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ramon M Barrera whose telephone number is (571)272-1987. The examiner can normally be reached on Monday through Friday, except Wed., from 9 to 3PM.
